

PUBLIC SUBMISSION

As of: March 21, 2025
Received: March 15, 2025
Status: [REDACTED]
Tracking No. m8a-nd7r-an19
Comments Due: March 15, 2025
Submission Type: API

Docket: NSF_FRDOC_0001

Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-2544

Comment on FR Doc # 2025-02305

Submitter Information

Name: Kevin McCowan

General Comment

I do not believe AI will benefit the future of America in the realms of creative and generative occupations and hobbies. I can see its use in medical fields, linguistics, and other diagnostic fields to aid in faster work, but not in the arts. It should not be allowed to have copyrights, patents, or other rights from things generated by AI as this will enforce that a human is ultimately responsible for the act of creation, thus making it a tool and not a replacement for human work.

AI in creative areas is at best used for rapid concept generation for breaking art block of lack of vision on direction for an image or script, but it must not replace end products made by people. Otherwise, more things become created and owned by corporations and not the people and their cultures. The stories we tell through art should remain, in the end, owned by the people who engage with it, and not corporations, and Generative AI exists solely to exclude people from art.
