Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-2549

Comment on FR Doc # 2025-02305

Submitter Information

Name: Amber Viernes

General Comment

Hello! I am writing today to say that it is unconstitutional to allow generative AI companies to train their AI on content they don't own. I believe that AI puts individual liberty at risk, and therefore the future of American prosperity depends on strictly regulating AI technology.

Generative AI is nothing more than an amalgamation of stolen works from various types of media (online, print, images, artwork, photographs), etc. If you were to remove these ethical guardrails, it creates a dangerous precedent and opens the door for nefarious foreign actors or enemy governments to create misinformation. How is that constitutional? Aside from the intellectual property theft, there are several risks that generative AI has for our country.

There is also a matter of climate change. I would like to point to this article to show AI's growing carbon footprint:

<https://news.climate.columbia.edu/2023/06/09/ais-growing-carbon-footprint/>

Thank you for reading. Once again, I urge you to not give companies permission to train AI on content that does not belong to them.
