General Comment

It is disgusting to allow a singular Company to override all copyright infringement on people's own personal works. AI steals from actual humans creations and is a horrible thing for the states.

AI breeds laziness from companies to hire actual workers that are passionate about their job in place of some ugly garbage that nobody likes. AI content is overhyped and being pushed by businesses purely because they invested in it. Nobody that's an actual human enjoys this.

Shut this garbage down now.
