Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-2556

Comment on FR Doc # 2025-02305

Submitter Information

Name: DeeJay Jones

General Comment

This entire document is a farce, and a waste of American resources and time. Not only that, but it's results could be DISASTROUS. AI is not anything useful, besides for creating deepfakes which could greatly harm our information sector. We have seen the basis for current "AI" technology, and it is literally the same exact thing process that bots have been running on for well over a decade. There is no "race" for AI, because there is no goal to win. It is utterly useless to the government besides for the creation of propaganda. Now, Elon Musk is invested in AI and therefore would love to have monetary conflicts of interest in pushing his agenda forward and removing restrictions from his work, but this is flagrantly going against the will of the American people. Americans do not want AI in their day to day. Americans do not want AI copying their work. Americans do not want AI confusing the public discourse. Nobody cares about this except Elon Musk and a handful of tech companies who get money from Gen AI providers. Further, as an American Businessperson whose livelihood is threatened by AI which *has already* scraped my work and produced fake versions of things i have made, it is insulting to think that my president wishes to make this situation worse for me and his hardworking constituents like me.

Imagine AI running rampant with no regulation! Star Wars, in it's entirety, posted everywhere, but because an AI trained itself on the films and TECHNICALLY produced it's own new shots, there can be no copyright lawsuit over it. Historical art by prolific creators now dead, overshadowed by fake imitations of their technique, until nobody knows the difference. Every job posting, court record, Wikipedia article, and historical document from here on out is largely written by AI, and therefore is actively PLAGIARIZING the hard work of actual employees, journalists, and government workers. America not only has less jobs in a world with rampant AI, the jobs it has are constantly being copied by AI which shares that job in another sector. This is the only thing AI can do. It is not intelligence, it is PURELY artificial. It steals work and presents said work. Every American would have to undergo a dedicated and constantly updating training regimen to be able to tell the difference between reality and fake news. This is a HORRIBLE idea that is only being put forth to benefit billionaires- especially Musk. There is no other reason. It is, again, useless to this administration and all future administrations.

Please do not do this.
