

PUBLIC SUBMISSION

As of: March 21, 2025
Received: March 15, 2025
Status: [REDACTED]
Tracking No. m8a-nrxr-dfzr
Comments Due: March 15, 2025
Submission Type: API

Docket: NSF_FRDOC_0001

Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-2562

Comment on FR Doc # 2025-02305

Submitter Information

Name: Anonymous Anonymous

General Comment

OpenAI and other such generative AI development groups are essentially asking for access to the information, copyrights, intellectual property and so on of citizens regardless of their consent or permission for what is ultimately a pursuit that has already been used to develop a litany of scams, fraud, and harmful misinformation. These private enterprises want to skip proper channels of seeking permission for the use of the information they desire, and so they seek to use the Federal government to permit them to skip a series of processes that are in place to protect our rights and freedoms - processes that are referred to here as "unnecessarily burdensome requirements". Those "burdensome requirements" are in place to prevent unwarranted data acquisition.

No organization, corporation or otherwise, should be given this sort of carte blanche over our data and creative pursuits (the latter being our freedom of expression) if we do not desire it. Couching this in arguments about China's place in AI development is loaded - asking us to prefer our own federal government to be ruled by tyranny in the face of another tyrannical entity - this does not protect our democracy but excuse our government's slide towards tyranny and thus justifying it as an answer to tyranny. This cannot be allowed.
