General Comment

This is such a gross overstep of AI companies into avoiding any legal repercussions of their gross theft of Data.

What? If their AI gets a hold of my images or my writing? Or text?

Suddenly they can just steal my very personal very private photos that will end up being used in generative AI?

Am I going to see my nudes used so they can make a profit, and I can't do anything about it?

This is completely unacceptable,
These companies are going to make themselves immune from correct legal repercussions.
