General Comment

Gen AI is theft. Allowing companies to train their AI on copyrighted material is a disgrace to creators and should never be legalized. This is an obvious ploy to make big tech AI people richer while actual artists will lose the rights to their own intellectual properties and will no longer be able to share their creations with the world for fear of it being stolen by soulless AI. Gen AI is anti art and is all trash. I will never support anything that uses Gen AI. The Trump administration's policies have only caused harm to the American people and the world, and this is no different. Gen AI should be regulated and copyrighted material protected from it.
