Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-2580

Comment on FR Doc # 2025-02305

Submitter Information

Name: Eddy Berry

General Comment

Artificial Intelligence has been a growing concern for many Americans and for good reason. It is not something to be thought on lightly, but it is known that Generative Artificial Intelligence, or GenAI, has been stealing from copyrighted works across the Internet.

Copyright laws should not be bent for any AI. These laws have been in place for decades and it should always be used to protect HUMAN artist and HUMAN creators. The companies who are trying to scrape these things from smaller creators should be held to the law just as everyone else. If they are using copyrighted material, they are not making something new nor is it beneficial to society. It is only hurting artists and writers.

Do not remove these protections for AI. Do not allow these technologies to take over human creation. It is not something that will result in anything positive for anyone.
