General Comment

The allowance of AI to make unrestrained use of copyrighted materials without expressed consent from the copyright holder will lead to a never ending cycle legal battles over fair use and the devaluation of value of said material. It will function as poison to the market in which any incentive to invest and gain a return on investment will be stigmatized. Businesses in particular will be hurt as their intellectual property will lose a vital protection that keeps them market competitive.

It will lead to the destruction of innovation. Any use of AI must be tempered with the respect of intellectual property rights. It is unamerican in spirit to demand one's property be forced to be used by other individuals for free
