General Comment

Generative AI is theft, pure and simple. It steals not only from artists and authors, destroying their livelihoods, but from companies as well. Product designs for companies will be fair game if this happens.

From the poorest to the richest, we are all vulnerable to having our creativity and income taken without recourse.

And for what? Products that spit out half truths and lies? AI doesn't understand or reason. It tells people to drink bleach. It makes up facts. It's a glorified collage made of scraps of people's works.

GenAI needs to be strictly regulated, not let loose to destroy lives and livelihoods.
