General Comment

We all know that this executive order action plan is meant to bolster the tech industry with a technology that frankly doesn't contribute anything to society. It doesn't even contribute anything to the economy, given that pretty much every AI company has lost money for the past several years! Replacing a human's labor with AI results in (sometimes extremely dangerous) misinformation, bad quality service, and far-reach and consequences in every industry. AI is trying to disrupt many industries without any safety nets for the people who work in those industries, need those industries for their own day-to-day life, and quite frankly for the companies that try to employ AI. Point blank, this is a waste of time and a waste of money and we all know that it is a ploy to appease Elon Musk. Until the AI industry gets better and actually delivers on its promises, there should be no reason why we have such a robust AI action plan. We are putting the cart before the horse, and as a result many people are going to get thrown under the bus!
