General Comment

Firstly, I am an artist who makes a living off of the creative works that I produce. Allowing AI companies carte blanche access to use my work in training data is directly undermining my ability to make that living. In a way, this would force me to train my direct competitor for my livelihood.

Secondly, the energy demands that AI databases require is absolutely monstrous. The ecological impact of these companies cannot be understated, and the sheer amount of energy that these companies use will dramatically increase the cost of energy.

I do not want to be forced to subsidize these companies with my tax dollars or my art.
