General Comment

I truly believe that allowing AI to use any and future information to "improve itself" is a irreversible detriment on not only our current society, but also the future of America. IPs from countless industries and companies would be in jeopardy if this is allowed to go through. Not to mention, numerous individuals who have already posted on the internet would be at risk of sensitive data being used by said AI. More research and regulations must be put in place and suggested before this plan should even be put before congress.
