General Comment

Copyright law is not an ‘unnecessary burden’ on private AI companies—it’s one of very few defenses available to the millions of people who work to create the art, research, and communication that ‘generative’ AI wants to churn up and replace. Unshackling these companies from any potential consequences just lets them steal from actual human beings. And no, it won’t even preserve some American AI dominance—it’ll just make some CEOs and shareholders richer. AI with actual value to our country and our world does not need protection from copyright law; any company that claims otherwise is peddling nothing more than a plagiarism machine.
