General Comment

A.I. is not the pioneering discovery that it is being made out to be, it is worse for the environment than emissions from cars or livestock combined, and steals more from those who truly work than the boss above them. It is shameful to see the government that is supposed to protect those beneath them, instead finding another way to subvert and avoid actually changing things for the better. In short, artificial intelligence will be the downfall of all, including those who seek to use it for their own agenda.
