General Comment

GENAI and AI resources should remain restricted. AI learning should only be done with openly public resources and not private works or works from places not owned by domains trying to train their AI models. If AI models use work from sources and do not notify said sources, that should be considered theft, especially when AI is not transparent on where they obtain their learning sources. AI learning that uses resources and are not fully transparent on where they obtain said sources should be punished by the law. If there are no laws to punish AI, they should be made in order to protect the assets of the people, organizations, and private creators who are unknowingly being abused and stolen from. The new AI Action Plan is overwhelmingly abusive and strips the liberties of the people, taking away basic liberties of ownership and the ability for people to stand for themselves and their own works.
