General Comment

AI cannot be permitted to use copyrighted images in their data sets. Giving an AI the ability to train on copyrighted images sets an anti-social precedent that spits in the face of all creators. This will harm ALL creative businesses and make even promoting one's art work/businesses very dangerous to their income and also destroy any motivation to even be creative. I do not consent to any of my work being used to train AI, and I know that millions upon millions of creative people will agree with me.
