## General Comment

AI has no place in the future of America, and I am sick and tired of Open AI and Google thinking that just because they have a lot of money they can jsut buy their way into control of everything. AI trained off stolen artwork is immoral and should absolutely be illegal, especially since the 5 pay who all have enough market shares in OpenAI to get rich from it won't ever care about what this will take from us. This is take our privacy, our right to our own words and ideas online. I hope that you, whoever is putting this bill into action, are fully prepared to hand that right over to the corporations if you plan to go through with this, which you should not be. I can't imagine whatever children you have being too happy with you, knowing that they'll never know a moment's peace on the internet. Please, for all our sakes, for mine and yours, please please please don't allow this bill through!
