

PUBLIC SUBMISSION

As of: March 21, 2025
Received: March 15, 2025
Status: [REDACTED]
Tracking No. m8a-pk6u-tbuf
Comments Due: March 15, 2025
Submission Type: API

Docket: NSF_FRDOC_0001

Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-2722

Comment on FR Doc # 2025-02305

Submitter Information

Name: Anonymous Anonymous

General Comment

I am a citizen of the state of California. I believe that A.I. can change the world in wonderful and positive ways, provided it is handled and designed in a safe, ethical, and unbiased way. However, given what I've seen from A.I. in recent years, I feel not enough is being done to hold those in charge of these digital systems accountable. To remove the ability to hold these companies accountable for any issues that may arise from their product sets an extremely dangerous precedent, especially considering the reach and power their product holds. Without accountability, companies like OpenAI or XAI could simply program their A.I.s to say what they want them to say, regardless of the truth. Combine this with the ease by which bots can proliferate on social media, and you have a potential situation where the truth is drowned out by bots designed to spread and convincingly defend lies. No human being should be subjected to this. A.I. is a powerful tool, and can do great good for the world if handled properly. Passing this proposition simply opens the door for A.I. companies to abuse their own product, and those who rely on it.
