Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-2727

Comment on FR Doc # 2025-02305

Submitter Information

Name: S Farrelle

General Comment

I am writing this comment to make it clear I oppose any agreement which takes away the legal copyright protections and gives intellectual property over to artificial intelligence companies without any compensation to The Entity or the Creator of the property. This is a terrible policy that will not only ruin the expertise and professionalism the United States is known for, it will allow the legal looting of property in which these companies have no legal right to as it stands today. Artificial intelligence is a dead end in the format currently in place. The companies and individuals financing, pushing, and generally trying to encroach their Technologies on the people in Mass are doing so in bad faith. They should have to compensate in order to use material. Whether it be written, illustrative, or any other medium. And that compensation should be at a level commiserate with the value of the work. Mark my words, passage of this regulation would be an incredible slippery slope that will only lead to the downfall of the United States and its dominance in the world and business, art, and many other industries. I oppose this in full terms.
