General Comment

This is harmful to every single creator out there, be it artists, game developers, video creators, streamers... every single creative industry will suffer from this and they may not be able to continue what they are doing. AI itself is harmful to both the environment and to human artists and creators. The content AI creates has no real value, so it takes the creativity out of art. I don't want to see a future where AI is everywhere because it just destroys the lives of real artists.
