General Comment

Letting this bill past will mean the extinction of human driven creative works, As a result this will cause dramatic decline to the economy as people will no longer be able to reliably make a living off their own work as a human if a machine will just do the work. Not to mention the flood gates this will open in terms of civilian safety, such as evidence being forged to make an individual seem that they committed a crime or act that they did not do. Even worse the possibility if said evidence is used in a court of law. I am begging you to strike down this bill lest it ruins the United States, all to satisfy a handful of corporations.
