Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-2742

Comment on FR Doc # 2025-02305

Submitter Information

Name: Nicholas Thorpes

Address:

General Comment

"Generative AI" and almost all forms of it are sourced from sources that do not consent to it's use for Gen AI. Gen AI is not transformative in nature and is immoral and downright a breach of creative rights. The Federal Government should refute Gen AI and restrict it's usage to properly sourced material within they are the progenitor of and such holds the rights to use the material they source. Any other use of Gen AI is unconstitutional and infringes on copyrights and basic human rights. Having an algorithm use the likeness of people and creative material without owning said material, buying said rights to the material, or paying the people involved in the creation of used material, is wrong.

Generative AI should NOT be protected and should be restricted. This Executive order is wrong and should be revoked for the rights of all American citizens to protect creative freedom and liberty.
