Docket: NSF_FRDOC_0001
Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479
Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-2749
Comment on FR Doc # 2025-02305

Submitter Information

Name: Jeremy Allen

General Comment

AI has mostly been used as a means of theft of imagery and information without consent for artists, musicians, and otherwise unrelated individuals, and makes key information & research more needlessly difficult. This Executive Order only serves to make the country worse than it already has been, such as using up more energy & resources than needed, allow scammers and bots to persist, severely damages any real means of education, and increasing the chances of putting privacy & cybersecurity in jeopardy. The only people who really benefit from this are tech people and companies who continue to overestimate AI's effectiveness in spite of the growing negativity and backlash, not to mention that it's been used to avoid paying actual working citizens. It's highly probable that it'll also be used as a weapon against countries without the means of AI or are as technologically advanced, severing limiting trust with other countries and governments. The reason there's been specific codes and programs designed to slow down or outright ruin AI models is because an increasingly higher amount of people outright despise what AIs been doing for the past few years. Please start being an actual government instead of letting faceless machines do it for you.
