General Comment

Hi, just wanted to say that I think AI can do a lot of damage to the incredible assets America has built over the years. We are the cultural center of the world, our musicians, artists, producers, actors and writers set the pace for all of human culture and have done so for generations now.

Copyright laws exist to protect exactly this wealth and should not be discarded without serious consideration.

Are we building this AI tech for Americans or are we building it for Silicon Valley investors? It's hard to tell when protections we benefit from are revoked in the name of progress.
