Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-2769

Comment on FR Doc # 2025-02305

Submitter Information

Name: Stephanie Brown

General Comment

As an freelance illustrator, my business has been dramatically disrupted by the rise of generative AI. My income has been dropping consistently every month for the last year and a half. There are less clients looking to hire human artists for work when they can use AI for cheaper, even though they can't copyright work not created by a human. On top of that, these AI models have been trained on the work of myself and thousands of other artists, without permission, consent, or compensation. This is a blatant violation of US copyright laws. And the amount of energy consumed by these AI generators doesn't justify the use, as most people just use it to cut corners or purely for entertainment. And as someone who cares about the future of our planet, this is a major issue for me. There's so many other problems with generative AI that I won't get into, but those are the main highlights.
