## General Comment

See attached file(s)

My name is Amanda Le.

This document is approved for public dissemination. The document contains no business-proprietary or confidential information.

Document contents may be (print page 9089) re-used by the government in developing the AI Action Plan and associated documents with-out attribution.

I implore the current government to re-instate the protections issued by Biden-Harris's AI Executive Order 14110 of October 30, 2023 (Safe, Secure, and Trustworthy Development and Use of Artificial Intelligence) moving forward. In regards to just the issue of Artificial Intelligence, the government must take action to ensure that the American people are put first. The use of AI should not excuse organizations from legal liabilities and obligations to their people, and the protections implemented through the Executive order 14110 ensures that civil rights are maintained. In order to continue to have trust in the AI systems, there must be protections in place to ensure that AI can be used safely, securely, and without theft or destruction of the environment.

Requirements should be necessary and met to enhance America's AI innovation, otherwise any advancements will come at a greater cost and risk to the people's job security, coun-try's security, and overall safety than it will provide any benefits to our society. Please en-sure that "unnecessarily burdensome" requirements are in place to ensure safety and secu-rity and does not open the door to crime and theft under the guise of "AI training."

As part of the public, I caution against the push for AI because this puts my job as risk and destabilizes the economy as well as harms the environment. Please work as a government to implement adequate security measures to stop the unsafe growth of AI, and ensure that AI only grows in a controlled manner.
