Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-2792

Comment on FR Doc # 2025-02305

Submitter Information

Name: Rose Fisher

General Comment

AI is already a national security risk. It spreads misinformation, can be used to create non-consensual pornographic material of minors and adults, and relies on the stolen media and content created by artists, writers, and virtually anyone who has an online presence. AI also has drastic effects on the environment. As a creator, I do not want my content or my likeness used to train AI. I have a right to privacy as well as the right to express myself confidently without fear that my work is being stolen and used by corporations without my consent.

Copyright laws ensure that I own my creations and that I own my likeness. I am a United States citizen. I am a creator. And I am against the development of artificial intelligence.
