Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-2818

Comment on FR Doc # 2025-02305

Submitter Information

Name: Ryan Bond

General Comment

Generative AI companies, such as OpenAI, spend billions of dollars to lose billions of dollars on products that do nothing more than waste all of said money. There is no reason to give them any protections other than to continue the farce that is the declining AI market that will continue decline, and giving them any protection will harm consumers, artists, creatives, and anyone whose work was stolen by these companies to profit off of them. Not only that, any federal money spent on these companies will go down the same drain that any investors (i.e. Softbank) have put into these companies, which could aptly be described as nothing more than money pits, losing more money than any market seen before.
