General Comment

Do not allow AI to freely be used by companies, agencies, providers, government, etc. without regulation. There needs to be regulation and protection against the use of AI. AI is NOT the future of the state, country, or the world. AI can be used for assisting in achieving a greater product, not for creating products. AI can be used as a substitute; not as a replacement for work. There are also artists of many mediums that will be affected if this takes place, it means no one can get work done and this will NOT cut costs of the the economy, it will kill the economy due to fact no one will be paid, and thus businesses will not flourish and no employee will be paid, resulting in a hard crash. This statement applies to musicians as they are a part of being an artist. Please take into consideration of this regulation and do not proceed forward with this action. Please review and take time to research the impact of AI use and the products out of it. The community will be relieved and will be happy if this does not proceed forth. I have said my peace. Have a wonderful day.
