General Comment

Hello I'm writing this to say that I do not believe AI holds a place in the future of the US because AI steals from my livelihood as an American and profits off of theft of artwork, music, writing, even people's voices are being stolen from to replace all voice actors with ai which will remove a huge portion of jobs and significantly hurt small business particularly artists, voice actors, writers, and musicians, and photographers as their work is stolen by storing it in an AI database to copy and learn from for the purposes of replacing the people that have made the work that ai has learned from. Allowbg so to scan and steal all copyrighted work is going to be disastrous for small businesses and independent people, court case Naruto v. David Slater aka the "monkie selfie" court case where the courts determined that only humans can hold a copyright and since every picture has a copyright on it ai should be required to respect copyright law and not be allowed to steal copyrighted images especially when it's being done to replace the people who make ai learning possible. I hope that you'll support small businesses and Americans who need to protect there copyrighted work to insure the continuation of their business and stop AI from continuing to steal people's work.
