Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-2830

Comment on FR Doc # 2025-02305

Submitter Information

Name: Joseph Evans

General Comment

Artificial Intelligence systems must not be allowed to be trained on copyrighted material without permission and licensing of the creators/owners of that material. The nature of LLMs dictates that they can and will generate exact duplicates of the training data, which is a copyright violation. Most of the training data for these models was taken without permission or any kinds of licensing, which is unfair and threatens the incomes of the people who created the material to begin with. All training data must be explicitly opt-in and all rights holders need to be paid for their work, or this is no better than piracy on a grand scale, which is already against the law.
