General Comment

This bill essentially allows AI companies to steal ALL materials across human creation to feed their gen-AI models, completely disregarding copyright and intellectual rights. This is a spit against everything this nation stands for and I am appalled that lawmakers are so easily swayed by tech hype into ignoring decades of copyright laws that protect writers, artists, and all humans with a creative passion. I oppose this plan with all my might and every government official who does not fight against this will not have my vote going forward.
