General Comment

Hello,

I strongly disagree with this RFI, as it is in harm to the legal protections of creatives as well as the overall copyright system. By allowing generative AI companies such as OpenAI and Google to train on protected material, it would actively undermine the right of ownership and consenting peoples. Those who do not want their content to be used for AI training, including those under legal copyright, should maintain their protections and right to deny such corporations from enacting further usage. If they no longer have those protections, then that would be allowing generative AI companies to effectively steal any material desired for their own usage. This RFI does not stand for the rights of people, and should not be pursued.
