General Comment

This goes against everyone's privacy as a citizen. Not only that, but AI is such a new and upcoming thing that has hit the media and is purely hype. It is the new "big cool thing" and is not sustainable for the long term future. AI only does a mediocre job, and reiterating on it to get something good is painstaking and near impossible. Not only that, but due to it being built on the data of other people, it is a copyright nightmare.
