

PUBLIC SUBMISSION

As of: March 21, 2025
Received: March 15, 2025
Status: [REDACTED]
Tracking No. m8a-qidz-27pm
Comments Due: March 15, 2025
Submission Type: Web

Docket: NSF_FRDOC_0001

Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-2844

Comment on FR Doc # 2025-02305

Submitter Information

Name: Kimberly Delain

General Comment

We need copyright protection laws, and any agreement to let AI train on stolen content will only destroy our creative industry. Creatives will not only no longer find good paying jobs, but a mass disillusionment in the field will destroy it far into the future, creating a world where America will only ever regurgitate the same artistic ideas, stagnate, and lose any position at the forefront of cultural development. The importance of art - from graphic design to music to movies to video games to comics - will wither in the face of a regime that sells out its people for a handful of company interests. This move will make America fall behind the world yet again in another industry, and be disregarded in this topic while flourishing arts elsewhere in the world thrive. Countless skills and arts will be lost here.

The very idea that the legislative branch is entertaining the idea of allowing it is the snake swallowing its own tail. Do it, and the snake will consume itself and perish.

I hope federal regulators will uphold the laws already stated, protect copyright from mass theft, and deny AI the rights to others' skills, labor and creations.
