General Comment

AI negatively affects my friends' livelihoods as creatives and I do not see the value gained from many of the current things generative AI is trying to do. Social media is flooded with false information and misinformation that uses AI images. I do not think the USA has much use for AI and I sincerely hope this does not pass. It would be disastrous, just like how AI already has been for this country. So many people do not know the difference between AI and real images already.
