## General Comment

As an artist, I am against the use of AI for image creation. Not only is the scraping of our images illegal and against copyright, it is demoralizing. AI should be used for the good of the people, not take away life's pleasures such as the creation of art. Not only that, but the environmental impact of AI is so high that at this stage of our technology, we will not have a world to live in if we decide to help its health decline further. It is not worth the lives of the people around us.

Until you find a way that this does not impact our environment, this should not be entertained in the slightest.
