General Comment

Genuinely nothing of any significance will be gained by letting a machine that has already eaten dozens upon dozens upon dozens of other creator's works eat even More works to produce, at absolute best, shoddy facsimiles. This technology cannot do anything that one would trust highly trained people to do. Giving a computer the kinds of responsibilities these people plan to can only lead to more people getting hurt than any kind of significant gain, which is nothing to say about the excessive amount of power usage these generative AI creations use up.
