General Comment

I wholeheartedly believe that the widespread use of AI (especially in corporate and governmental application) does not hold a place in the future of the United States.

AI as a tool has proven in years that it used to steal from the creativity and livelihood of many American artists and profits off of theft. AI as an industry only weakens the American people and economy, and will damage the image and strength of the country, rather than bolster it as the document suggests. AI is an overhyped and rather weak tool that is fleecing the eyes of the American public.
