As of: March 21, 2025
Received: March 15, 2025
Status: [REDACTED]
Tracking No. m8a-qwllh-ehva
Comments Due: March 15, 2025
Submission Type: API

Docket: NSF_FRDOC_0001

Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-2892

Comment on FR Doc # 2025-02305

Submitter Information

Name: Anonymous Anonymous

General Comment

By allowing AI companies to continue to go unchecked, whether it be with regard to copyright issues or not, people will be able to continue making AI generated videos of Elon Musk sucking and kissing all over Trump's feet. That's not even the upper limit of what they'll use it for, and that should scare you.

Allowing AI companies, OpenAI included, to train their models on the copyrighted work of others is straight up copyright infringement. I don't care how you try to slice it. They should be held liable for this like any person.

On top of this serious issue, the amount of energy it takes to power all of these generative AI databases is a huge hit to the environment and is only going to further destroy our planet and climates. The human race is on a fast track for extinction if we aren't careful.
