General Comment

No corporation deserves unfettered access to others' works without due compensation. Additionally Generative AI and LLMs are largely resource-intensive novelties, incapable of separating truth from fiction or performing any work with a degree of success even remotely comparable to the results produced through human craftsmanship. Grant NO access to OpenAI or other such services, if not for these reasons then because these endeavors constitute nothing more than a fools errand that will cost several hundred billion dollars that will never meaningfully be paid off.
