

PUBLIC SUBMISSION

As of: March 21, 2025
Received: March 15, 2025
Status: [REDACTED]
Tracking No. m8a-qxoh-7866
Comments Due: March 15, 2025
Submission Type: API

Docket: NSF_FRDOC_0001

Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-2894

Comment on FR Doc # 2025-02305

Submitter Information

Name: Anonymous Anonymous

General Comment

Allowing OpenAi to use copyrighted works without consent or compensation will be the death of American innovation. It will strip any and all incentive to develop new IP, inventions or technologies if works that under other circumstances would be forced to be licensed or not allowed to make money with go to an AI company and added to their dataset. Why would a small business like a publisher, music studio or advertising firm create anything if there'd be no way for them to monetize it because as soon as it's forward facing in any manner, OpenAi will simply generate inferior copies instantly. Customs and Border control spend huge amounts of capital every year to intercept bootleg materials because of its damage to brands and the overarching economy, and yet give a free pass to a company that has shown no demonstrable way to turn a profit with their product as their services are largely unpopular and unwanted. Do not change copyright on this, what OpenAi is planning to do goes against Fair Use in every definition: using artists own work to push them out of their livelihood
