General Comment

IQ Throttles: A Standard for Controlling AI Intelligence

AI systems must include IQ throttles that limit the sophistication of perceivable intelligence. Individual citizens should have the ability to increase or decrease the IQ of AI systems they encounter within their local environment, similar to a dimmer switch for lighting. This local control ensures AI remains a tool that serves human needs at the local level but limits the widespread adoption and elimination of human jobs.

The AI Trust Council (TheAITC.com)

Implementation Strategy

A blockchain based voting mechanism will be established, integrating social networking, insurance, and finance. A robust KYC process tied to a cryptocurrency account and financial verification will eliminate fake bot accounts, ensuring only real individuals participate in governance.

Through this blockchain platform, users will vote on specific AI use cases. Every aspect of AI deployment can be debated and recommended, creating a transparent and democratic system. The resulting data pool will serve as a reference for lawmakers, enabling them to craft AI regulations that genuinely reflect public opinion and protect societal interests.

Ensuring Constitutional Liberties in AI

AI models must be built on a foundation that upholds constitutional civil liberties. The protection of individual freedoms such as freedom of speech, religion, assembly, and the press must be a core principle in the development of high IQ AI systems. This ensures that AI enhances human rights rather than suppressing them.

By implementing these controls, we can create a future where AI remains aligned with human values, while safeguarding democracy and personal freedom.

Article on human speciation written by Chris Wright, founder of The AI Trust Council.

AITC PITCH DECK

Artificial Intelligence Trust Council

DISCLOSURE STATEMENT

This is not an offer to sell securities or the solicitation of an offer to purchase securities. Offers, solicitations, and sales are made in jurisdictions where not lawful or prohibited. Securities are not registered. The securities of **The AITC Corporation** have not been registered under the Securities Act of 1933, as amended (the "Securities Act"), or any other applicable securities law. **The AITC Corporation** securities have not been approved or disapproved by the U.S. Securities and Exchange Commission (the "SEC"), any other state securities commission or any other regulatory authority, nor have any of the foregoing passed upon the accuracy or adequacy of the information presented. Any representation to the contrary is a criminal offense. The offering of **The AITC Corporation** securities is made pursuant to an exemption from the registration requirements of the Securities Act and certain state securities laws. **The AITC Corporation**, therefore, is not required to comply with the specific disclosure requirements that apply to securities sold under registration statements filed with the SEC, including the requirement to publicly file certain reports with the SEC, so there is minimal publicly available information about our business, assets, liabilities, results of operations and other information typically available regarding publicly traded securities.

ELEVATOR PITCH

BASIC TRUST COUNCIL

People You Know and Trust in the Real World

COMPANY

- Dinosaur Internet giants are corrupt.
 - Lack of trust in traditional polling methods.
 - Lack of transparency in social media.
 - Lack of trust in centralized authorities.
 - Lack of trust in A.I. products and services.
- And a lack of understanding of their long-term impacts on humanity.**

The customer for this platform would likely be individuals and organizations that value transparency, trust, and democratic decision-making. This could include activists, journalists, researchers, academics, marketers, and anyone else who needs to gather accurate and trustworthy information from a large and diverse group of people. Additionally, the platform could appeal to crypto enthusiasts who value decentralization and transparency, and who are looking for new and innovative ways to use the cryptocurrency.

Rudimentary Twitter like-site with polling =
Trust, Privacy, Freedom, Golden Rule.

Photos, videos, messages, images, reports, history, financial info, and real data can be trusted.

Replace the corrupt dinosaur internet giants with a core of good through a single digital platform based on privacy, individual liberty, and the golden rule.

- Consumer Reports
- Indeed
- LinkedIn
- TripAdvisor
- Web Browser Search Engine
- Crypto Exchange and Wallet
- Investment Trust
- Social Media with Polling
- YouTube
- Twitter
- Private Messenger app
- Data Storage
- Privacy Vault

BUSINESS MODEL

- ☀ Polling
- ☀ Social Media
- ☀ Web Browser
- ☀ Private Messenger
- ☀ Video Streaming
- ☀ Cloud Storage
- ☀ Micro Lending
- ☀ Private Insurance
- ☀ Meta Data Storage
- ☀ Crypto Wallet / Exchange

SERVICES

- The platform could charge a small fee for each transaction on the platform.
- This can include fees for staking bitcoin, participating in polls, and receiving rewards.
- These fees can provide a source of revenue for the platform.

- The platform could offer advertising opportunities to businesses and organizations that want to reach the platform's user base.
- This can include sponsored polls or other forms of advertising that are integrated into the platform.

- The platform could offer data analytics services to businesses and organizations that want to better understand social trends and opinions.
- This can include data on user behavior, voting patterns, and other relevant metrics.

Application Programming Interface

- The platform could offer API access to third-party developers who want to build applications or services on top of the platform.
- This can include access to the platform's data and other resources.

- The platform could establish partnerships with media outlets, news organizations, and other relevant organizations.
- This can provide the platform with a new source of revenue, while also increasing the platform's visibility and credibility.

MARKET

- Content reach is shown visually.
- The more payment the higher the reach.
- The higher their trust score, the higher their reach.
- This way users will know exactly the reach of their content.
- The market consists of internet users who are interested in establishing online trust.
- The platform can be used by both **AITC** members and non members.
- **AITC** members help establish trust through participation in polls. Nonmembers can view the content and analyze polling data.

STRATEGIC PLAN

Become the worldwide leader of online trust. Providing a scalable social media polling platform that helps users authenticate online information as being real or fake.

Provide a trust rating system for digital content. Photos, Videos, Messages - if it's genuine, we validate it, promoting trust in the digital age.

Provide a stratification of individual trustworthiness that is established and maintained by AITC users for AITC users.

Help steer the ethics of AI technologies and services towards a pro human direction by the very members of the most trusted and pro human groups on the AI trust council.

Practical applications of this trust can be applied to:

- **Crypto Wallets**
- **Meta Data Storage**
- **Group Insurance**
- **Micro Lending**
- **Polling**
- **API Development**

TACTICAL PLAN

Professional Union Outreach

- Firefighters
- EMTs
- Veterans
- Humanitarians
- Commercial Pilots
- Air Traffic Controllers

**American
Red Cross**

Celebrity Influencer Promotion

- Film Stars with background in these professional roles or prior membership in these organizations
- YouTube influencers that align with the targeted market

Thought Leader Roundtable Discussion Events

- Live and online recorded discussion events to raise awareness of AI issues and opportunities
- Vu Studios Las Vegas Summit Event with local entertainers, pro human A.I. thought leaders, and technology influencers.

**WOUNDED WARRIOR
PROJECT**

Freedom Oriented Media Outlet Engagement and Paid Promotion

- Media spotlight interviews
- Podcasts
- Print media advertisements
- Targeted ad placements

MANAGEMENT

Chris Wright
Founder of AITC

- 25 years of entrepreneurial and military experience to the project.
- His decorated US Army military career and Civilian Commercial Pilot aviation career inspire confidence

in his ability to navigate complex challenges.

- His entrepreneurial accomplishments showcase his visionary mindset and business acumen.
- Mr. Wright has experience in leading multiple companies: CEO of Wright Design Screen Printing Company, CEO E21 Consulting, and CEO Tradewind Logistics.
- Mr. Wright has proficiency in driving rapid business growth, by managing customer relationships, and implementing efficient processes.
- Leading the AITC, Mr. Wright's vision for optimizing digital trust online and mitigating the downsides of A.I. highlights his dedication to transforming online trust.
- With his diverse background and achievements, he embodies the ideal leadership for the AITC's mission to revolutionize the way trust is built and maintained in the digital world.

Randy "Vegas" Anderson

- An esteemed professional with a distinguished career, reflecting a rich amalgamation of leadership qualities, strategic business insights, and commitment to the preservation of innocent life.
- Military Distinction: U.S. Army Special Forces over 8 years. His multifaceted background in strategic complexity, tactical orchestration, and meticulous execution underlines his exceptional problem-solving capacities, flexibility, and devotion to mission fulfillment.
- Civic Duty and Safety: Las Vegas Firefighter and Advanced EMT for over two decades. Randy's response to intricate emergency scenarios and his commitment to specialized training in emergency medical and fire science signify his resolute dedication to the preservation of life.
- Entrepreneurial Leadership: Lead Project Manager, Training Consultant, Lead Tactical Trainer, Owner-Operator, and CEO.
- Commitment to Human Welfare: The underlying theme in Randy's diverse roles across sectors is his profound dedication to humanity's safeguarding. His entire vocation speaks to his commitment to protect others.

Eric Preston
AITC Technology
Leadership Board

- Cybersecurity expert, trusted by the US Department of Energy to safeguard the government's nuclear and energy related secrets.
- Cybersecurity and Technology Leader, over 20 years of top-tier experience, with a current role as Deputy Program Manager, Cyber at Criterion Systems in Las Vegas. Guiding over 165 personnel nationwide, he ensures flawless execution of Cyber Ops for the National Nuclear Security Administration.
- Erik's previous roles include leadership positions at Roberts Communications Network, SWITCH, and the U.S. Navy.
- Recognized for leading complex projects, such as Switch's IPO on the NYSE, replatforming systems to cloud-native solutions, and multi-million dollar implementations, he epitomizes innovation and excellence.
- Holds prestigious certifications like CISSP and CISM, along with specialized training at BlackHat and DEFCON.
- He is a proven leader, where security, innovation, and growth are paramount.

SUMMARY OF OFFERING

AITC
is raising
\$400,000
in capital through
private equity in
consideration of
10% of the Company
in a pre-seed
"Family & Friends"
round via a Simple
Agreement For Future
Equity (S.A.F.E.).

The **S.A.F.E.** is the
precursor to the
Company's formal
seed round in which
AITC intends to raise
\$3 Million
for 20% Equity,
based on a **\$12 Million**
Dollar Pre-Money and
\$15 Million Post Money
Valuation.

Post the **S.A.F.E.** and
follow-on Seed round,
and after the
Company has achieved
significant traction and
software development,
it is assumed a
Series "A"
will commence with a
\$32 Million Valuation.

(As shown on page 13 of this
presentation deck.)

CAPITAL TYPE

Private Equity Through Accredited Investors¹

"Accredited investor" is a term used by the Securities and Exchange Commission (SEC) under Regulation D to refer to investors who are financially sophisticated and have a reduced need for the protection provided by certain government filings. In order for an individual to qualify as an accredited investor, he or she must accomplish at least one of the following: (1) Earn an individual income of more than \$200,000 per year, or a joint income of \$300,000, in each of the last two years and expect to maintain the same level of income; (2) Have a net worth exceeding \$1,000,000, either individually or jointly with a spouse; (3) Be a general partner, executive officer, director or a related combination thereof for the issuer of a security being offered.

Private equity is money invested in firms which have not 'gone public' and therefore are not listed on any stock exchange such as "Over the Counter", "Pink Slips", NASDAQ or the NYSE. Private equity is illiquid because sellers of private stocks (called private securities) must first locate willing buyers. Investors in private equity are generally compensated when: (1) the firm goes public, (2) it is sold or merges with another firm, or (3) it is recapitalized. Before deciding to seek investors, know the type of investor needed and then research the individuals or investment groups to find those interested in the industry or business. Then include their requirements in opportunity presentation. In general, equity investors require a much more detailed business plan than a plan designed for debt. Depending on several factors, the Securities Exchange Commission (SEC) may require documentation, circulars, disclosures, and other forms and documents such as a Private Placement Memorandum (PPM).

Private equity is equity capital that is not quoted on a public exchange. Private equity consists of investors and funds that make investments directly into private companies or conduct buyouts of public companies that result in a delisting of public equity. Capital for private equity is raised from retail and institutional investors, and can be used to fund new technologies, expand working capital within an owned company, make acquisitions, or to strengthen a balance sheet. The size of the private equity market has grown steadily since the 1970s. The majority of private equity consists of institutional investors and accredited investors who can commit large sums of money for long periods of time. Private equity investments often demand long holding periods to allow for a turnaround of a distressed company or a liquidity event such as an IPO or sale to a public company. Private equity firms will sometimes pool funds together to take very large public companies private. Many private equity firms conduct what are known as leveraged buyouts (LBOs), where large amounts of debt are issued to fund a large purchase. Private equity firms will then try to improve the financial results and prospects of the company in the hope of reselling the company to another firm or cashing out via an IPO.
