General Comment

It can't be overstated what a terrible idea this is. There are iterations of "AI" - a term that gets thrown around way too often and is used to indicate multiple very different things - that serve a purpose. Pattern recognition for tumor formation, for example. In contrast, LLMs are useless garbage that create nothing but useless garbage. You propose to undermine entire industries dependent on IP protections so that a handful of companies can mass-produce ugly, pointless, unappealing schlock that demonstrably doesn't have an audience. Ask Microsoft how their launch of Copilot went. Ask them how popular it is. (It's not). People don't like or want this tech: it doesn't have a use. Don't destroy what vestiges of the economy still work who are - again, please pay attention to this important detail - creating a product no one wants.
