Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-2905

Comment on FR Doc # 2025-02305

Submitter Information

Name: Brittany Brown

General Comment

Generative Artificial Intelligence and similar operations that use unauthorized materials for learning are a threat to the American economy, and to the confidence of the American people. If we cannot have the exclusive rights to our own materials, we may cease making and sharing these altogether (as has already begun with the "dying internet" theory), rapidly erasing American culture from the internet and even from the media altogether. Furthermore, these tools have incredibly dangerous consequences for adults and children alike. AI is increasingly used to prey upon the individual for pornographic content without consent. What we need are *stricter* laws and punishments to address the abuse of privately-owned media. We should NOT be relaxing them. Finally, the AI cycle is a rapidly-degrading one. We know for a fact that AI does not only learn from original content, but from its own content that is often mass-produced and published. This leads to a deterioration in art, in writing, in creative mediums as a whole. There are a lot more problems both niche and wide-spread to give consideration to. But the fact is this: The American people deserve the exclusive right to their creations and how they may be used. This is a cornerstone to our culture and our means of capital. Machines will never be as great as the American creative. It's time to end this.
