General Comment

My name is Candace, and I strongly oppose the AI Action Plan recently proposed by President Donald Trump. The American government has rightfully placed regulations that prevent the harmful use of AI. AI should not have such access to our private information unless it has gone through extensive testing and approval, with the added cyber security needed to protect confidential and classified data among all sectors. I do not trust loosening the reigns on AI use for our government, for the same reasons I wouldn't reduce regulations from the FDA. Our citizens could be compromised and/or harmed if the use of AI is not handled carefully.
