General Comment

Creatives of all industries rely on their IPs as their livelihood and lifeblood. Allowing AI to run rampant will destroy these industries, and it will have a ripple effect - movies, comics, art, even something as simple as advertising, informational posters, EVERYTHING will be affected. Don't do this. AI should not have free reign over anything and everything, especially not copyrighted material. AI companies should not get away with the mass sourcing of data. This is the allowance of theft, plain and simple.
