General Comment

I do not agree with these policies. We need to continue to provide protections against AI and its unbridled use. Allowing various individuals and companies to have no limitations on what can be used will lead to the spread of greater misinformation and the destruction of art. Nothing will be safe from the prying eyes of corporations and everything will become up for grabs to be used and abused by higher powers. The overuse of AI will also lead to the downgrade of intelligence. If we as humans must rely on a machine to learn, then we cannot possibly grow beyond where we are now.
