General Comment

Do not let OpenAI use copyrighted material to train their AI, it is theft from other creators and producers, and a threat to capitalism itself if there is only one sole company allowed to do whatever they like with the creations of the public. AI is a threat to America's future. It has stolen jobs and material already, it consumes so much energy, and it will only get worse if legalized. Open AI should only work with what it is given. Copyrights will be completely disregarded in the future if on large company is allowed to bypass it, which again, is a threat to capitalism.
